

B11 PIPES, FITTINGS & FLOW CONTROL

PRODUCT + SYSTEM

Electrofusion Fittings & Welding Machines

20 mm to 1200 mm, PN10 to PN25

OVERVIEW

Electrofusion Fittings provide one of the most reliable and permanent methods of joining HDPE piping systems, creating strong, leak-proof, and maintenance-free connections. Kedia Water House Pvt. Ltd. also supplies advanced Electrofusion Welding Machines designed for accurate and efficient joining of HDPE pipes and fittings.

SPECIFICATIONS

FITTING SIZES	20 mm to 1200 mm
MATERIALS	PE80 & PE100 HDPE
PRESSURE RATINGS	PN10, PN16, PN20, and PN25
MACHINE CAPACITY	Suitable for 20 mm to 1200 mm piping systems
MACHINE MODELS	Manual and automatic models
MACHINE FEATURES	Digital display · Automatic welding parameter control · Barcode scanning · Data logging · Memory storage · USB data transfer (selected models) · Automatic cooling cycle monitoring

ELECTROFUSION FITTING TYPES

Electrofusion Couplers Electrofusion Elbows Electrofusion Tees Electrofusion Reducers Electrofusion End Caps
Electrofusion Saddles Electrofusion Tapping Saddles Electrofusion Repair Saddles Electrofusion Transition Fittings
Other Accessories

APPLICATIONS

Water Supply Projects Sewerage Networks Irrigation Systems Industrial Pipeline Applications Municipal Water Supply
Infrastructure Projects

KEY FEATURES

- Safe, durable, and long-lasting pipeline performance
- Compact, portable, and easy to operate
- Consistent, high-quality welds
