

B5

PIPES, FITTINGS & FLOW CONTROL

PRODUCT

DI, MS & GI Flange Pipes

25 mm to 1200 mm, fabricated to spec

OVERVIEW

DI, MS & GI Flange Pipes are specially designed for water transmission and distribution systems, providing strong, leak-proof, and easy-to-maintain pipeline connections. Kedia Water House Pvt. Ltd. supplies premium-quality Ductile Iron (DI), Mild Steel (MS), and Galvanized Iron (GI) Flange Pipes, including fabricated and custom flanged pipe assemblies.

SPECIFICATIONS

SIZES	25 mm to 1200 mm and above
MATERIALS	Ductile Iron (DI) · Mild Steel (MS) · Galvanized Iron (GI)
LENGTHS & RATINGS	Custom lengths and pressure ratings to suit project requirements
FABRICATION	Fabricated and custom flanged pipe assemblies

3 MATERIALS

Ductile Iron (DI) Flange Pipes

Mild Steel (MS) Flange Pipes

Galvanized Iron (GI) Flange Pipes

APPLICABLE STANDARDS

Nepal Standards (NS)

Indian Standards (IS)

Other applicable international standards

APPLICATIONS

Municipal Water Supply

Pumping Stations

Water Treatment Plants

Overhead Tanks

Irrigation Schemes

Industrial Utilities

Infrastructure Projects

KEY FEATURES

- Quick installation
- Easy maintenance
- High structural strength
- Long service life
