PIPES, FITTINGS & FLOW CONTROL

PRODUCT

Flanges & Gaskets

15 mm to 2000 mm, PN6 to Class 300

OVERVIEW

Flanges & Gaskets are essential components for creating strong, secure, and leak-proof joints in water supply piping systems, enabling easy installation, maintenance, and dismantling of pipelines, valves, pumps, and other equipment.

SPECIFICATIONS

SIZES	15 mm (½") to 2000 mm (80")
MATERIALS	MS · Carbon Steel · Stainless Steel (SS304/SS316) · Ductile Iron (DI) · GI · Forged Steel
PRESSURE RATINGS	PN6, PN10, PN16, PN25, PN40, ANSI Class 150, Class 300, and higher pressure ratings

FLANGE & GASKET TYPES

Slip-On Flanges · Weld Neck Flanges · Blind Flanges · Socket Weld Flanges · Threaded Flanges · Lap Joint Flanges
Plate Flanges · Companion Flanges · Custom Fabricated Flanges · EPDM Gaskets · NBR Gaskets · PTFE (Teflon) Gaskets
Neoprene Gaskets · CAF (Non-Asbestos) Gaskets · Spiral Wound Gaskets · Ring Type Gaskets · Full Face Gaskets

APPLICABLE STANDARDS

Nepal Standards (NS) · Indian Standards (IS) · Other applicable international standards

APPLICATIONS

Municipal Water Supply · Pumping Stations · Water Treatment Plants · Irrigation · Industrial Utilities · Firefighting Systems
Infrastructure Projects

KEY FEATURES

- Excellent sealing performance
- Corrosion resistance
- Durability
- Long-term reliability
