

B7

PIPES, FITTINGS & FLOW CONTROL

PRODUCT

GI Fittings & GM (Gun Metal) Valves

¼" to 8" fittings, 15 mm to 100 mm valves

OVERVIEW

Galvanized Iron (GI) Fittings are essential components used to create secure, leak-proof, and durable connections in water supply pipelines, plumbing systems, pumping stations, firefighting networks, irrigation, and industrial applications. Gun Metal (GM) Valves are designed to provide reliable flow control, durability, and corrosion resistance in water supply, plumbing, irrigation, pumping, and industrial pipeline systems.

SPECIFICATIONS

GI FITTING SIZES	¼" to 8" and above
------------------	--------------------

GM VALVE SIZES	15 mm to 100 mm and project-specific requirements
----------------	---

GI FITTINGS & GM VALVES

- GI Elbows
- GI Tees
- GI Sockets
- GI Unions
- GI Reducers
- GI Bushes
- GI Nipples
- GI Couplings
- GI Flanges
- GI Pipe Clamps
- GM Gate Valves
15 mm to 100 mm
- GM Globe Valves
15 mm to 100 mm
- GM Ball Valves
15 mm to 100 mm
- GM Non-Return (Check) Valves
15 mm to 100 mm
- GM Bib Cocks
- GM Stop Cocks
- GM Ferrule Valves
- GM Float Valves
- GM Foot Valves
- GM Air Valves

APPLICABLE STANDARDS

Recognized industry standards

Recognized quality standards

● APPLICATIONS

Water Supply Pipelines

Plumbing Systems

Pumping Stations

Firefighting Networks

Irrigation

Industrial Applications

Municipal Water Supply

Infrastructure Projects

● KEY FEATURES

- Excellent corrosion resistance
- High strength
- Easy installation
- Smooth operation
- Leak-proof performance
