

B3

PIPES, FITTINGS & FLOW CONTROL

PRODUCT

Mild Steel (MS) Pipes

15 mm to 1200 mm, Light to Heavy class

OVERVIEW

Mild Steel (MS) Pipes are strong, durable, and versatile steel pipes widely used for water transmission and distribution networks, pumping mains, rising mains, overhead tank connections, cross-country pipelines, and other water supply infrastructure projects.

SPECIFICATIONS

SIZES	15 mm (½") to 1200 mm (48") and above
WALL THICKNESS	Light, Medium, Heavy, and customized wall thicknesses
LENGTHS	6 m, 12 m, and custom lengths
END CONNECTIONS	Plain End (PE) · Beveled End (BE) · Threaded End (TE) · Flanged End

4 WALL THICKNESS CLASSES

Light Class Medium Class Heavy Class Customized Wall Thickness

APPLICABLE STANDARDS

Nepal Standards (NS) Indian Standards (IS) Other applicable international standards

APPLICATIONS

Municipal Water Supply Irrigation Industrial Utilities Firefighting Systems Infrastructure Developments Pumping Mains
Rising Mains Cross-country Pipelines

KEY FEATURES

- Excellent strength
- Weldability
- Corrosion protection (when coated)
- Long service life
