WATER SUPPLY & TREATMENT

PRODUCT

Water Meters

15 mm to 500 mm, mechanical to smart

OVERVIEW

Water Meters are precision instruments designed to accurately measure and monitor water consumption in municipal water supply, distribution networks, commercial buildings, industrial facilities, irrigation systems, and infrastructure projects.

SPECIFICATIONS

SIZES	15 mm (½") to 500 mm (20")
SCOPE	Both domestic and large-scale municipal water supply projects

8 METER TYPES

- Multi-Jet Water Meters
- Single-Jet Water Meters
- Woltman Water Meters
- Electromagnetic Water Meters
- Ultrasonic Water Meters
- Bulk Water Meters
- Mechanical Water Meters
- Smart Water Meters
 - AMR/AMI Compatible

APPLICABLE STANDARDS

Nepal Standards (NS) ISO IS Other applicable international standards

APPLICATIONS

Municipal Water Supply Distribution Networks Commercial Buildings Industrial Facilities Irrigation Systems
Infrastructure Projects

KEY FEATURES

- High accuracy
- Low maintenance
- Long service life
- Helps optimize water distribution and reduce losses
