

C1

WATER SUPPLY & TREATMENT

PRODUCT

Water Well Screens (V-Wire / Johnson Type Screens)

2" to 24", slots 0.25 mm to 5.00 mm

OVERVIEW

Water Well Screens (V-Wire / Johnson Type Screens) are precision-engineered filtration systems designed for borewells, tube wells, and groundwater extraction, allowing maximum water flow while effectively preventing sand, gravel, and other unwanted particles from entering the pumping system.

SPECIFICATIONS

DIAMETERS	2" to 24"
LENGTHS	Standard 3 m and 6 m lengths
SLOT SIZES	0.25 mm to 5.00 mm
CONNECTIONS	Threaded · Flanged · Welded Ring · Plain End
MATERIAL	High-quality Stainless Steel (SS304 and other grades as required)

APPLICATIONS

Municipal Water Supply Projects

Drinking Water Schemes

Irrigation

Industrial Water Supply

Groundwater Development

KEY FEATURES

- High open area
- Superior filtration efficiency
- Excellent corrosion resistance
- Maximum water yield
- Extended borewell and pump life
