

D3 INFRASTRUCTURE & CONSTRUCTION

PRODUCT

Steel Wire Ropes

6 mm to 52 mm, galvanized and IWRC

OVERVIEW

Steel Wire Ropes are high-strength lifting and support cables designed to withstand heavy loads and demanding operating conditions.

SPECIFICATIONS

DIAMETERS 6 mm to 52 mm and above

LENGTHS Custom lengths as required

7 CONSTRUCTIONS

Galvanized Wire Ropes Ungalvanized Wire Ropes Fibre Core (FC) Wire Ropes Independent Wire Rope Core (IWRC) Wire Ropes
Rotation Resistant Wire Ropes PVC Coated Wire Ropes Custom Steel Wire Ropes

APPLICABLE STANDARDS

Recognized quality standards

APPLICATIONS

Water Supply Projects Borewell Pump Installations Deep Well Applications Bridge Construction Lifting Equipment
Industrial Operations Infrastructure Development

KEY FEATURES

- High tensile strength
- Excellent load-bearing capacity
- Superior flexibility
- Corrosion resistance
- Abrasion resistance
- Long service life
